## 👤 ABOUT ME

I am a recent masters graduate with special focus on GNU/Linux and systems level programming. Being a passionate developer, I have keen interest in all things Databases, Networking, Operating Systems and Cybersecurity. From peer to peer overlay DHT networks to concurrent RDBMS, I have built systems with maintainable and extensible code-bases and look forward to working with people who love to take on biggest engineering challenges.

## ⚙️ SKILLS

### Programming/Scripting

C	★★★★★	Go	★★★★★
C++	★★★★★	Rust	★★★★★
Python	★★★★★		

### Popular Frameworks and Tools

Docker	★★★★★	Ghidra	★★★★★
Git	★★★★★	GDB	★★★★★

### Platforms

GNU/Linux	★★★★★	Windows	★★★★★
Android	★★★★★		

## 🎓 EDUCATION

**University Of Florida** *Gainesville, USA*

*August 2019 - May 2021*

- **Master of Science** in Computer Science, **GPA 3.51/4.00**
- **Relevant Coursework:** “Database System Implementation”, “Distributed Operating Systems”, “Ethical Hacking and Penetration Testing”, “Malware Reverse Engineering”, “Blockchain: Optimization and Application”

**SRM Institute Of Science and Technology** *Chennai, India*

*July 2015 - May 2019*

- **Bachelor of Technology** in Computer Science and Engineering, **CGPA 8.3/10.0**
- **Relevant Coursework:** “Network Programming”, “Database Management Systems”, “Operating Systems”

## 📖 PUBLICATIONS

### A Relay for A SDN Controller

*February 2020*

- Indian Patent Application No. 202041008146 dated March 06, 2020
- Realtime communication between controllers within distributed SDN

### An Attendance System and Method Thereof

*December 2018*

- Indian Patent Office Journal dated July 27, 2018, page No. 28230
- System for attendance using facial recognition

## 🔧 PROJECTS

### Malware Analysis

*April 2021*

- Ghidra, x64\_dbg, Python, Radare2 <https://github.com/r0ck3r008/malware-analysis>
- Malware sample analysis reports with Ghidra/Rizin workspaces and memory dumps
- Analyzed Families: *Carberp RAT, AveMaria RAT, Ryuk Ransomware and FritzFrog BotNet*

### DFS: A Database Engine Written from Scratch

*April 2020*

- Linux, C++, Google Test, flex/yacc <https://github.com/r0ck3r008/database-from-scratch>
- Database engine tested with processing **1GB or 7,000,000+ records**
- Complete with aggregate, join and select functionalities

### A Performance Benchmark of Image Encryption Algorithms

*December 2019*

- C, Python, Image Encryption, RISC-V, ARM, x86 <https://github.com/r0ck3r008/arch-perf-benchmark>
- Compares simulated **RISC-V, ARM and x86 ISA**
- Image encryption benchmark framework for **RC4, Chirikov and Vigenere algorithms**

### Twitter Engine for Highly Concurrent Systems

*December 2019*

- Elixir, Phoenix Framework, Websockets <https://github.com/r0ck3r008/twitter-engine>
- Distributed and Fault tolerant Twitter Engine **tested with 100,000 simultaneous user processes**

### Tapestry: A P2P Distributed Hash Table Network

*November 2019*

- Elixir, Tapestry, Distributed Hash Tables [https://github.com/r0ck3r008/tapestry\\_p2p](https://github.com/r0ck3r008/tapestry_p2p)
- Resilient P2P network capable of **connecting 2,000+ clients with reliable resource sharing**
- Reliable resource sharing even **with 20% failed nodes**
