🛉 ABOUT ME

I am a masters student with 4+ years of experience in GNU/Linux and systems level programming. Being a passionate developer, I have keen interest in all things Databases, Networking, Operating Systems and Cybersecurity. From peer to peer overlay DHT networks to concurrent RDBMS, I have built systems with maintainable and extensible code-bases and look forward to working with people who love to take on biggest engineering challenges.

⚙ SKILLS

Programming/Scripting

C	✹✹✹✹✹	**Go**	✹✹✹✩✩
C++	✹✹✹✹✩		
Python	✹✹✹✩✩	**Rust**	✹✹✩✩✩

Popular Frameworks

Docker	✹✹✹✹✩	**Git**	✹✹✹✹✩

Platforms

GNU/Linux	✹✹✹✹✩	**Android**	✹✹✩✩✩

🎓 EDUCATION

University Of Florida *Gainesville, USA* — *August 2019 - April 2021*

- **Master of Science** in Computer and Information Sciences, **GPA 3.54/4.00**
- **Relevent Coursework:** Database System Implementation, Distributed Operating Systems, Advanced Data Structures, Malware Reverse Engineering

SRM Institute Of Science and Technology *Chennai, India* — *July 2015 - May 2019*

- **Bachelor of Technology** in Computer Science and Engineering, **CGPA 8.3/10.0**
- **Relevant Coursework:** Network Programming, Database Management Systems, Operating Systems

📰 PUBLICATIONS

A Relay for A SDN Controller — *February 2020*

- Indian Patent Application No. 202041008146 dated March 06, 2020
- Realtime communication between controllers within distributed SDN

An Attendance System and Method Thereof — *December 2018*

- Indian Patent Office Journal dated July 27, 2018, page No. 28230
- System for attendance using facial recognition

</> PROJECTS

KademGo — *Ongoing*

- *Go, Kademlia, Distributed Hash Tables* https://github.com/r0ck3r008/kademgo
- Vanilla implementation of Kademlia DHT protocol in form of a Go Library

DFS: A Database Engine Written from Scratch — *April 2020*

- *Linux, C++, Google Test, flex/yacc* https://github.com/r0ck3r008/database-from-scratch
- Database engine tested with processing **1GB or 7,000,000+ records**
- Complete with aggregate, join and select functionalities

A Performance Benchmark of Image Encryption Algorithms — *December 2019*

- *C, Python, Image Encryption, RISC-V, ARM, x86* https://github.com/r0ck3r008/arch-perf-benchmark
- Compares simulated **RISC-V, ARM and x86 ISA**
- Image encryption benchmark framework for **RC4, Chirikov and Vigenere algorithms**

Twitter Engine for Highly Concurrent Systems — *December 2019*

- *Elixir, Phoenix Framework, Websockets* https://github.com/r0ck3r008/twitter-engine
- Distributed and Fault tolerant Twitter Engine **tested with 100,000 simultaneous user processes**

Tapestry: A P2P Distributed Hash Table Network — *November 2019*

- *Elixir, Tapestry, Distributed Hash Tables* https://github.com/r0ck3r008/tapestry_p2p
- Resilient P2P network capable of **connecting 2,000+ clients with reliable resource sharing**
- Reliable resource sharing even **with 20% failed nodes**
